

Data-Lock Document Presentation System

Professionally presented documents, organized and controlled on CD (or other electronic storage media)

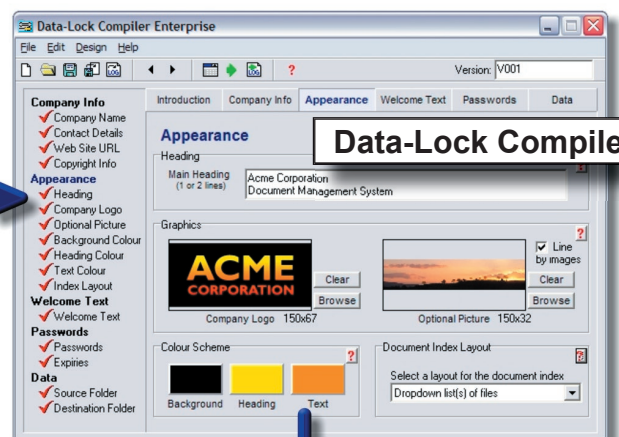

The Data-Lock Reader presents your documents securely in an interface customized to your corporate image

The Data-Lock Compiler automates the design and generation of each customized Data-Lock Reader

Select the document files you want included in the Data-Lock Reader interface

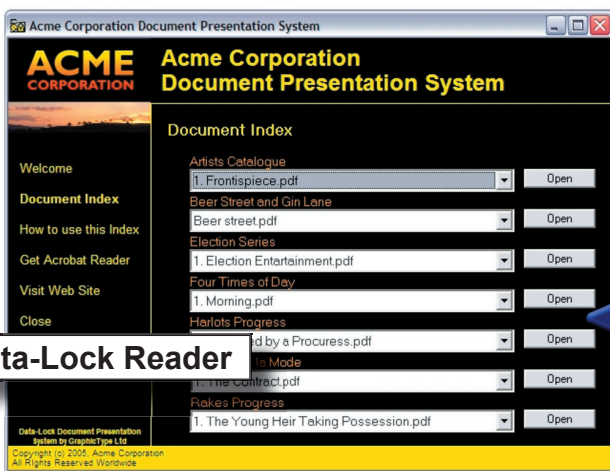

Define the Data-Lock Reader interface: logo, picture, colour scheme, title, welcome message, contact details, copyright information, web site link, and optional passwords and their timeout dates.

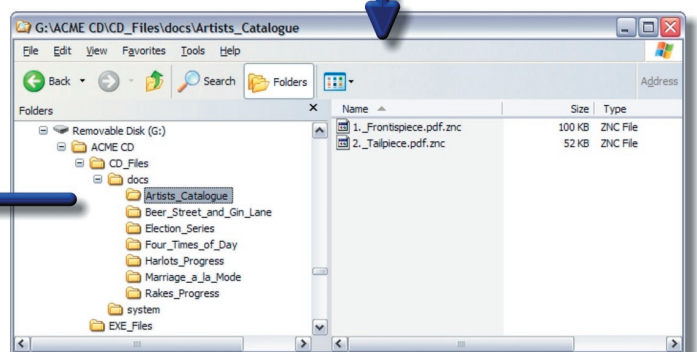

Data-Lock Compiler

Run the customized Data-Lock Reader burn to CD, send by email, upload HTML files to web site

Data-Lock Reader

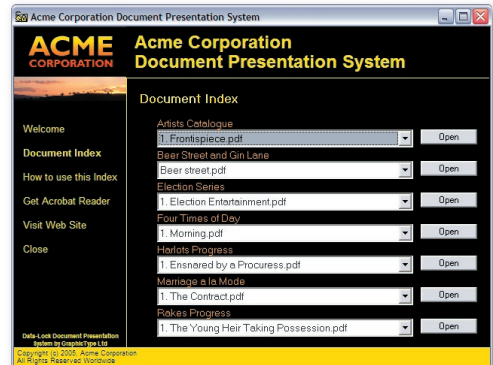

Compile the project

Simple, powerful, flexible and secure document presentation
Organize, index and control your documents, archives & records

The Data-Lock Reader

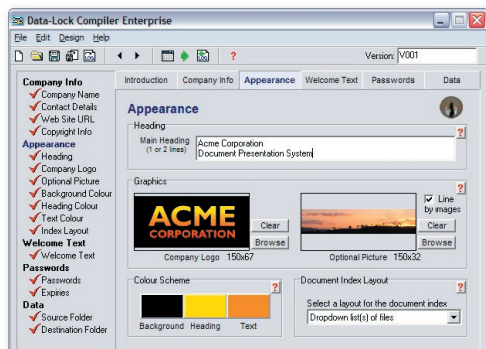

- ✓ The Data-Lock Reader provides a secure and customized interface to documents for distribution inside and outside your organization.
- ✓ The Data-Lock Reader is driven by a Microsoft® Windows™ application with a customizable interface that does NOT need to be installed on the user's computer (runs direct from CD).
- ✓ Access to the documents can be password protected, and you can choose to have the passwords expire at predefined intervals to control time-critical data*.
- ✓ You can distribute Data-Lock Reader files on CD (or any other electronic storage media), or via email, or via the web**.
- ✓ Customize the Data-Lock Reader interface with your company logo, picture, colour scheme, title, welcome message, contact details, copyright information and web site link.
- ✓ **EITHER** Your service bureau can create a Data-Lock Reader customized for your company, **OR** you can license the Data-Lock Compiler and do it yourself.

For more information: <http://www.data-lock.com/datalockreader.htm>

The Data-Lock Compiler

- ✓ The Data-Lock Compiler is very easy to use, and provides powerful, fast & flexible design capabilities. Even those without any design expertise can rapidly obtain superb results.
- ✓ You can choose how your document index appears in the Data-Lock Reader interface, depending on your document folder structure. There are six or eight** document index layout options.

- ✓ You can save projects for reuse when the data changes. Version numbering and password expiry provide tight control over who has what documentation and when*.
- ✓ The Data-Lock Compiler generates files ready to burn to CD, complete with autorun and ReadMe files.
- ✓ The Data-Lock Compiler generates a self-extracting EXE file, and also a ZIP version for distribution via email.
- ✓ The Data-Lock Compiler generates HTML files ready to load to your intranet or web site, with an identical interface to that of the Data-Lock Reader**.

- ✓ There are three versions of the Data-Lock Compiler: **Standard**, **Professional*** & **Enterprise****
